

Durable Fiberglass Rebar

Greenbends™ are corrosion-free, factory-formed 90° L-Bends designed for use with Greenbar2X® in residential and light commercial projects. Made in the USA and supporting local jobs and supply chains, they deliver proven strength and code-compliant performance: ready to install without the delays or risks associated with field bending of steel. Stocked in various sizes, Greenbends™ streamline planning and speed up installation. Alternatively, made-to-order Blackbends™ are also available for larger or custom project needs.

Build Stronger. Faster. Better.

Trusted Performance & Formed to Last

Greenbends™ deliver the same corrosion-free reliability as our straight bars. Lightweight and easy to handle, they provide labor savings, speed up placement and reduce installation errors. With stocked L-Bends for everyday jobs and made to order options for unique designs, Greenbends™ keep projects efficient, on schedule, and built to last.

Meets or Exceeds Standards

Greenbends™ are engineered and independently tested to meet or exceed industry standards, codes, and specifications for GFRP reinforcement. Factory-formed to ACI and ASTM guidance, with strength adjustments built into the design, they deliver reliable, code-compliant performance you can trust.

MATERIAL STANDARDS: ASTM D7957 & CSA-S807 Grade I

RESIDENTIAL & COMMERCIAL CONCRETE: ICC EER-5548, ICC ESR-5548, ACI 117, ACI 332 & ACI 440.11

MASONRY: TMS 402/602-22

Standard Stock Bends & Applications

Greenbends™ are offered as stocked 90° L-Bends in various bar sizes, giving contractors a ready-to-install solution for common residential and light commercial projects such as driveways, patios, pool decks, footings, and slabs.

90° Bends

BAR SIZE	DESCRIPTION
#3	24" x 24"
#3	36" x 36"
#4	36" x 36"

All bends are packaged in bundles of 20, with 500 bends per pallet for ease of handling, storage, and transport.
